

Plan with Confidence for Safety, Fit & Performance

Our exclusive HEARTHMATCH™ system instantly compares your fireplace to dozens of industry-leading Wood, Pellet, Gas/LP, and Electric fireplace inserts. Visit us today with your measurements to quickly discover options feasible with your fireplace and mantel.

Note: These measurements are for a preliminary analysis. When you start your project, our technicians can visit your home to take additional measurements to allow a full analysis for **Safety, Fit & Performance.**

- A** Width of fireplace opening
- B** Height of fireplace opening
- C** Depth at Top of Opening from front of the facing brick/stone to inside back wall of fireplace
- D** Depth at bottom from front of facing brick/stone
- E** Back Wall Width
- F** Back Wall Height
- G** Distance to mantel leg or wall LEFT RIGHT
- H** Hearth Extension LENGTH DEPTH
- I** Height from Hearth Extension to wood trim above

Please bring these photos (on your phone is fine!):

1. Your entire fireplace, w/mantel and hearth
2. Your entire house from outside, w/chimney
3. Your chimney, showing where the ladder may be placed

Thank you for choosing
