

Our Annual Gas/LP Preventative Maintenance Service is the most thorough service available to keep your stove running at peak performance and Keep You Warm & Happy throughout the next heating season.

Burning gas or propane creates an acidic sediment that must be cleaned off periodically from the metal components in your stove or firebox.

During the service, our technicians will follow the protocol specified by the manufacturer of your appliance for its annual maintenance, including:

- 🔥 **We will respect your home.** We use blankets to protect your hearth area while we clean your stove or insert.
- 🔥 We will thoroughly inspect for signs of wear: gaskets, seals, and electrical connections.
- 🔥 We will clean all metal components, including the pilot assembly and burner, in order to prevent corrosion from sediment.
- 🔥 We will refresh the ember bed.
- 🔥 We will clean the glass.
- 🔥 We will clean all exterior surfaces and hearth area.
- 🔥 We will fully test the system.

What our customers are saying:

"I thought my gas insert looked great, but after the Enchanted Fireside service, the flame looked incredible - the fire was much more yellow, with bigger flames and a beautiful glowing ember bed. I couldn't believe the difference." J.D., West Boylston

While we are there, we will gladly answer your questions about the operation and maintenance of your stove.
